THE B. W. & Co. Pubmi Thermo integrand.
FEEDING BOTTLE. Artificial feeding is far from being considered sa projudicial to health. The conviction is more and more fr. quently findinguiterance from Physicians specially sequeinted with this subject, that feeding by means of a good bottle, such as the B. W. & Co. Patent Thermosafeguard, is to be preferred to the service of a wetnurse. Cow's milk previously predigested with a Zymine Peptonizing Powder is preferred to mother emisk in cases where this is not of normal. quantity & quality. The bottle has thermometer embedded in the glass; it is also graduated in cauces, so that the precise amount of food administered can be observed. The Edinburgh Medical Journal pronounces it "the best of all feeding bottles."-Supplied by all Chemists. h2

Commenting on the project the territorial standpoint the adventage to Siam is infinitely greater than to the States over whose surface the line actually passes. By the delivery of the European Siam mail at Penang and then transporting it over the line to Songka, then on to Bangkok by steamer, instead of taking it on to Singapore, it may be delivered in Bangkok at least three and a balf days earlier than under the present arrangement. This is one of the benefits

which the line must confer directly on Slam in all seasons of the year, to say nothing of the detention at Singapore for a day or two. which now often takes place, awaiting a steamer. Again, in the event of war cattle and food supplies, may reach Penang by the route from Slam without the risk of being intercepted, and even in time of neace it will, doubtless, come to be made use of nd to afford safe anchorage in all weathers to vessels of equal size to many those now engaged in the carrying trade of Siam. We do not speculate upon the probabilities of advantage being taken of the route to shorten the distance in the conveyance of the mail to and from thing But it is quite clear that to commercial interests time is of the first importance, and therefore it is not unreasonable to look in the direction of China for appreciation of the advantages which this route will offer to the mercaptile communities of that c untry, when it is shown that there will be a

The great mass the Oblasse to set up certain principles dearer to them than life, and to make a lively demonstration of maintaining them at all costs. But it is no less enstomery to head to necessity with a parfeatly good grace under cover of some convenient aphorism or far-fetched precedent. Contradictions are therefore the rule, and it is vain to make any forecast from any given dala. Nothing was plainer to everybody outside China, thirty years ago than that her most urgent need was railway communication; the question needed only to be stated to be solved? British law turned, in the hands of unsorupulous and no Governor or Viceroy could possibly gainsay the arguments. Strong in the faith of an cager demand for such an obvious want a great railway promoter visited Chiun in 1.64 with a complete relieme of trunk lines and branch lines

throughout the length-and breadth of the empire and its dependencies; and if in some instances the mountain chains were made to accommodate themselves in the map to the railway lines instead of the other way, that geographical detail was not likely to disconcert a draughtsman of the heroic type. Sir Macdonald stephenson, ed in hima fully accordited, his hoot, big with bachemes. He entered into correspondence with the Chambersof Commerce, with mercantile firms, Company, then represented by Mr. The Suther-

yet though both Central and Provincial Governments have been long convinced we see the progress is still fitful and slow. 'It is no rea! son or argument that is needed; but sim ly external pressure. After 27 years of discussion we find the railway problem in China reduced to

Of real policy we nev r see a trace in China. one thing only, in shutting its eyes to its fate. To speak of peace then was death, for was not the "face" of the sacred empire at stake? and none dared breathe the word which was in many minds. Now then at last we had got hold of a real national Chinese policy. War à outrance. When lo! one fine morning, when the cost of the war came home. to the government through the sheer exhaustion.

of their bullion-mere figures on paper failed to influence them -the mot d'ordre was given to stop fighting. And so there was but a step between war to the last man and the last shekel, and peace at any price China talks volubly about her face, but it is an inflated paper currency convertible into very small amount of actual coin, a bogey to be

used and dropped exactly as expediency may Having no guiding principles, or such as are doomed to be eternally thwarted in application. there remains nothing for China but to be squeezed into such shape as the bord bodies she meets with may determine. Other hands must mould her, since she is not expable of moulding herself. Nor is it easy to perceive any escape from this destiny, unless it be in the personal ascendant of the Emperor. He alone wields the authority to silence clamour, neutralize opposition, and lead the state into the paths of pleasantness and peace. Will he?

we leave the answer to the ingenuous reader.

Having no desire to be written down "pessimist"

CHINAN FU.

15th March. We hear that the official at Chiningchow has issued a very good proclamation in favour of the missionaries, both Roman Catholic and Protestant. What is more, placeards were issued by some of the natives condemning the gentry and the local official for driving the foreigners away, and for failure to protect, and saying that as many of the people were poor the good and

	point of iron or steel, making it extremely fluid,		•

A minute percentage of aluminium bas effect, as is well known, of lowering the melt point of iron or steel, making it extremely flu and facilitating the production of castings free Temperature from blow-holes. The new Stefanite process. with which experiments have been made in Germany, is designed to lessen the cost of the alloy and make its general use practicable. This process consists simply in the addition of emery and alum before the iron ore or pig is melted, the reaction of the alum on the emery giving rise to vapours of metallic aluminium, which instantly allow themselves with the iron, imparting the improved qualities which have hitherto been gained by the addition of manuf ctured aluminium or ferro-aluminium,

An English chemical journal reports a series of experiments by Mr. Banschinger to determine the resistance to frost of natural and artificial building stones ... From 3 to 6 pieces of each kind were selected, and their tonsile strength wet and dry, their capacity for absorbing water. alteration in volume, tensile strongth and behaviour toward water after freezing and thawing 25 times, and their sp ciffe gravity were determined. Of samples of 21 different kinds of natural stone; only 6 -one of dolorite, one of diorite. and 4 sandstones -were found to resist repeated freezing, though 4 others resisted fairly but not absolutely. Of 41 samples of artificial stone. similarly tested, only I were thoroughly unaffect. the Mint, the silver product of American mines Cargo will be received on Board until 1 P.M., address in full; value of same is required. ed, while 8 were fairly resistant.
